Excerpt from Stratigraphical System of Organized Fossils: With Reference to the Specimens of the Original Geological Collection in the British Museum: Explaining Their State of Preservation and Their Use in Identifying the British Strata This novel and interesting description of near seven hundred species of Fossil Shells, Zoophites, and other organized Fossils, found in England and Wales, and collected in identification of the Strata, refers particularly to the specimens of a geological collection deposited in the British Museum. On the specimens, Roman capitals mark the genus, - the figures, 1, 2, 3, c. refer to the species, -and the small letters, a, b, c, c. to the localities or sites in the Strata. This copious reference to the stratum which contains the Fossils, to the particular site therein whence obtained, and to the individual specimens of the collection, which is intended to be publicly exhibited in the British Museum, seemed to render figures of them unnecessary; especially as reference is constantly made to another work of the Author s now publishing by Mr. Sowerby. which consists
