

Boston Medical and Surgical Journal Volume 61

Filesize: 4.06 MB

Reviews

This ebook will never be effortless to get started on studying but extremely fun to read through. It is actually written in easy phrases and never difficult to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Pearl Corwin)

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 24 pages. OCLC Number: (OCOLC)60768073 Subject: Anthrax -- United States -- Prevention. Excerpt: . . . culture tests of the other samples, collected on October 18, revealed positive results. In a more recent instance, on November 6, 2003, USPS shut down 11 postal facilities in and around Washington, D. C. , after a preliminary test - not a confirmed result - from a routine air sample taken on November 5 indicated that a naval mail processing facility might be contaminated with anthrax. USPS tracked the flow of mail through its own facilities and closed 11 postal facilities that delivered mail to the naval facility. The subsequent confirmatory tests were negative, and the facilities were reopened about 3 days later. All the activities discussed above are interdependent, and many variables for each one can affect the results. Further, problems associated with any one of these activities could affect the validity of the results generated by the overall process. Given that there are so many variables, the use of different sample collection strategies, reflected in site-specific plans, could yield different results. For example, three potential sample collection plans could be used in one facility - plan A, using one collection method (for example, a swab); plan B, using two methods (for example, a swab and wipe); and plan C, using three methods (for example, swab, wipe, and HEPA vacuum). How these collection methods are to be applied - that is, how they are physically used and how much area each sample covers - is a variable. Within each plan, sample transportation protocols could differ, involving variables such as temperature - plans A and B might require transporting at ambient temperature, while plan C might...
