River Books. Paperback. Book Condition: new. BRAND NEW, Early Landscapes of Myanmar, Elizabeth H. Moore, This book describes the emergence of the Buddhist landscapes of Myanmar. The authoritative text is framed by the artefacts, sites and ecology of Upper and Lower Myanmar, with coverage of the Paleolithic, Neolithic, Bronze-iron chiefdoms that preceded Hindu-Buddhist walled polities of the first millennium AD. Views and descriptions of sites, many not published in English before, include Letpanchibaw, Htauksagon, Moegyobyin, Badigon, Tagaung, Halin, Sriksatra, Thaton and Dawei. The author's extensive fieldwork with Myanmar academics over the last decade brings an original perspective on the catalysts that structure landscape interaction, enabling expansion of agriculture, resource utilization and international trade networks. While the book's primary focus is the archaeology of Myanmar, this is linked to Yunnan, Thailand, Malaysia, Indonesia and South Asia. The central theme, however, remains the relationship between man and the environment; flexibility was the norm as seasons changed, rivers meandered and seasonal lakes formed, creating the shallow flooded terrain conducive to the early development of wet-rice cultivation, bronze-iron technology and brickwalled sites. Social changes later accelerated with the rise of the state but the author concludes that the most profound transformations were already in place in the first millennium AD landscape of Upper and Lower Myanmar. Profusely illustrated with site plans, site views, maps and artefacts, this book is aimed at encouraging research into the many new areas thrown up by its ground-breaking text.
