

Solutions of the Problems and Riders Proposed in the Senate-House Examination

Filesize: 8.62 MB

Reviews

These types of book is the greatest ebook readily available. I was able to comprehend every little thing using this published e pdf. I realized this pdf from my dad and i encouraged this publication to discover.

(Dr. Porter Mitchell)

SOLUTIONS OF THE PROBLEMS AND RIDERS PROPOSED IN THE SENATE-HOUSE EXAMINATION

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1864 Excerpt: . is placed upon a rough curve in space, and subjected to the action of given forces. Find the least coefficient of friction consistent with equilibrium. A thin straight tube revolves with a given angular velocity about a vertical axis through its lower end, which is fixed, the inclination of the tube to that axis being invariable. Determine the condition of equilibrium of a particle placed at a given point within the tube, supposing it to be (1) smooth, (2) rough. Let α = the inclination of the tube to the vertical axis, a = the distance of the particle from the axis, ω = the angular velocity. The effect of the rotation is to produce an acceleration w a perpendicular to the axis, and from it, the resolved parts of which parallel and perpendicular to the tube are $\omega^2 a \sin \alpha$, $\omega^2 a \cos \alpha$, respectively. Hence, if the tube be smooth, we have for equilibrium $g \cos \alpha = \omega^2 a \sin \alpha$; and, if the tube be rough, in the state bordering on motion, $g \cos \alpha - \omega^2 a \sin \alpha = \pm n (g \sin \alpha + \omega^2 a \cos \alpha)$, the upper or lower sign being taken, according as the particle is on the point of moving down or up the tube; there, $\mu \cos \alpha - \omega^2 a \sin \alpha$ must be not less than J , $\mu \cos \alpha + \omega^2 a \sin \alpha$. 4. Investigate equations for the determination of the motion of a particle in one plane under the action of two...
